

TE'S CROMPTON INSTRUMENTS ANALOGUE METERS

Table of contents

I. DIN panel meters

6

An extensive range of 48, 72, 96 and 144 mm DIN style panel meters. Short-scale ammeters, voltmeters and frequency meters incorporate slide-in dials and terminal covers. Long-scale meters are also available. Meters for power or energy contain in-built transducers and can be customised to suit many different system configurations and ranges. UL, CSA and Marine Approved.

Chapter 1

II. Saxon series panel meters

36

A range of 2½", 3½" and 4½" surface mount panel meters utilising pivot and jewel mechanisms and offering IP54 protection. The range offers iron vane and moving coil AC and DC ammeters and voltmeters, elapsed time and frequency meters. UL and CSA Approved.

Chapter 2

III. Fiesta series panel meters

42

A robust range of short-scale 3½" surface mount panel meter offering IP55 protection and featuring wide-view contoured windows. The range offers iron vane and moving coil AC and DC ammeters and voltmeters, elapsed time and frequency meters. UL and CSA Approved.

Chapter 3

IV. Challenger series panel meters

48

A range of 1½", 2½", 3½" and 4½" analogue panel meters. The Challenger analogue panel meters feature a detachable lower fascia plate, which allows either surface or window mounting. Meters use a high torque pivot and jewel movement. UL and CSA Approved.

Chapter 4

V. ANSI switchboard meters

56

High quality range of switchboard instruments with Class 1 accuracy and which complies with American ANSI-C39.1 (1981) specifications. Available in 4 1/2" case size, the rugged design characteristics meet the needs of the most demanding environmental applications.

VI. Meter relay panel meters

80

Series 239 meter relays combine a highly accurate indicator with High and Low set point relays. The relays can operate alarm and control devices when the monitored signal value moves outside the chosen set point limits shown by adjustable red index pointers.

VII. Sealed and ruggedised panel meters

86

Designed to comply with industrial, marine and military specifications, these 240° and 90° scale meters are resistant to extreme shock, vibration, temperature, dirt and humidity. The range offers a wide range of bezel sizes fitted with toughened glass.

VIII. Instrument selector switches

92

Panel mounted selector switches offer a 7-position voltmeter switch and a 4-position ammeter switch for reading line-to-line or line-to-neutral voltage and phase current.

DIN panel meters – short scale

FEATURES

- A range of the most popular short-scale measuring instruments in 4 case sizes
- Shock resistant sprung pivot and jewel movement
- Terminal covers supplied as standard
- EMC hard frequency meters are fully EMC and LVD compliant
- 1/4" 'fast on' terminals available

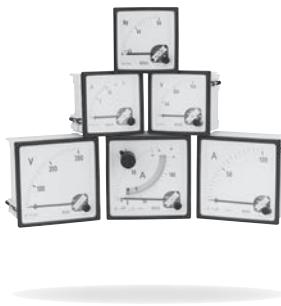

APPROVALS

BENEFITS

- Low cost
- Local indication
- Ease of installation
- Minimal training
- Low maintenance
- Customised options and features

A range of 48, 72, 96 and 144 mm DIN style panel meters measuring all electrical parameters and featuring moving coil or moving iron movements. All meters incorporate slide-in dials and terminal covers as standard. A range of customised options is available.

MOVEMENTS

MOVING COIL METER

Centre cored, self shielding moving coil movement, using pivots, hairsprings and sprung jewels. Seven variations have been designed in movement ranges: all intermediate ranges are achieved by shunting the next lowest range. All DC voltmeters are 1000 ohms per volt, rectified product run at 900 ohms per volt, millivolt meters use the 5 milliamp movement.

MOVING IRON METER

Clapper type repulsion design using pivots, hairsprings and jewel movements. The bottom jewel is oil filled to provide damping while the top is sprung for resilience. All voltmeters are manufactured with external voltage dropper resistors to substantially reduce the self heating effects.

FREQUENCY METER

Meter uses a 100 microamp 4000 ohm movement driven by an EMC hard frequency conversion circuit.

DIALS, SCALES AND POINTERS

Standard dials are white matt with black printed scales and bar knife-edge pointers. Black dials with white or yellow scales and pointers are also available. Interchangeable slide-in dials are used on the E242, E243, E244 and E246 90° moving iron, moving coil and frequency meter models.

General options include red supplementary pointers, red indexes (quadrant scales), red, green or blue lines, bands or segments, finely spaced divisions, multi-scales, special scales and captions to customer's requirements.

Short scale moving iron AC ammeters and voltmeters

Designed to measure AC current or voltage, these meters indicate true RMS values and are substantially independent of system waveform. Scales are calibrated down to 20%, and ammeters can have overload scales of x2, x3, x5 or x6 for motor start duty. Ammeters can be supplied for use with -1 A or -5 A current transformers, whilst voltmeters can be scaled for use with voltage transformers. Meters can be used to measure DC at reduced accuracy.

Short scale maximum demand indicators

The thermal/time characteristics of MDI meters monitor the most economic use of cable, fusegear and transformers. The directly heated bimetal element indicates mean RMS current over 8, 15, or 20 minutes, and a red slave pointer shows the highest value reached. The reset knob is wire sealable. Scales are calibrated to match the CT primary plus 20% overload. End values are selected from: 1.2, 1.8, 2.4, 3, 3.6, 4.8, 6, 7.2, 9 amps and their multiples of 10 and 100.

FEATURES

- Integral selector switch
- True RMS measurement
- Scaled for customer VT or CT primary values
- DIN 72 and DIN 96 models
- Terminal cover as standard
- Shock resistant sprung pivot and jewel movement
- x2 overload ammeters

APPLICATIONS

BENEFITS

- Space and time saving
- Competitive cost
- Local indication
- Ease of installation
- Low maintenance
- Customised options and features

These 96 mm and 72 mm units offer Class 1.5 true RMS measurement of three-phase AC voltage or current with various switch notation options. The integral selector switch eliminates the necessity for a separate selector switch, saving valuable panel space and providing installation benefits. These robust moving iron meters incorporate a clapper type repulsion design which utilises a pivot, hairspring and jewel movement. The bottom jewel is oil filled to provide damping while the top is sprung for resilience. Voltmeters are manufactured with internal voltage dropper resistors.

MOVING COIL METER

Centre cored, self shielding moving coil movement, made of light quality material which is not sensitive to external electromagnetic fields and is resistant to mechanical impacts and vibrations.

FREQUENCY METER

Meter uses a 100 microamps 4000 ohm movement driven by an EMC hard frequency conversion circuit.

DIALS, SCALES AND POINTERS

Standard dials are white matt with black printed scales and bar knife-edge pointers. Black dials with white or yellow scales and pointers are also available.

Standard options include red supplementary pointers, and non-reflecting glass. Other options available on request.

Long scale rectified AC ammeter and voltmeter

FEATURES

- Measures AC current or voltage
- CT connected ammeters
- Direct and VT connected voltmeters
- Linear scaling
- 240° long scale version
- x6 overload

APPLICATIONS

- AC switchgears, panels and distribution boards

CONSTRUCTION

- Mean value measurement of current or voltage
- Containing germanium diodes of low reverse current
- Slot in screw fixing

APPROVALS

- CE marked

BENEFITS

- Easy to operate
- Exchangeable dial
- Low consumption
- Terminal cover included

Long scale frequency meters with pointers or reeds

FEATURES

- Measures AC frequencies
- Pointer type available as 240° long scale version
- Reed type available with
 - 13 reeds (47-53 Hz, 57-63 Hz)
 - 21 reeds (45-55 Hz, 55-65 Hz)
- Direct or VT connected

APPLICATIONS

- AC switchgears, panels and distribution boards
- Control board
- Generator sets

CONSTRUCTION

- Pointer type contains internal transducer, powered from input voltage and moving coil meter
- Reed type uses steel reeds in an electromagnetic field. Reeds are calibrated to its individual frequency to vibrate in resonance with the electromagnet and vibrates at full amplitude

APPROVALS

Elapsed time meters (hours run meters)

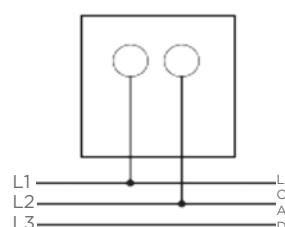

Elapsed time meters (ETM) or hours-run meters monitor "ON/RUN" time of plant and equipment, allowing the user to effectively control production efficiency, cost estimation and service period monitoring for preventative maintenance. Time is measured in increments of 0.01h up to 99999.99 hours after which the meter automatically resets to zero. Meters are non-resettable before this time to prevent accidental resetting.

Phase sequence indicators

Electronic phase sequence indicators ensure correct phase rotation and the presence of all 3-phase supplies. Incorrect or loss of phase can cause serious damage in a wide range of electrical machines. Ship-to-shore supplies, mobile generators and remote installations are particularly vulnerable to this problem.

Phase angle meters

Phase angle meters indicate the phase displacement between current and voltage. They are used in applications where the phase angle must be monitored, for example with tariffs having VAr penalties, or to optimise generator power delivery.

APPLICATIONS

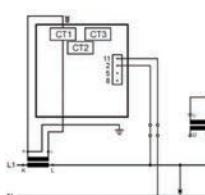

- AC switchgears, panels and distribution boards
- Control boards
- Generator sets

CONSTRUCTION

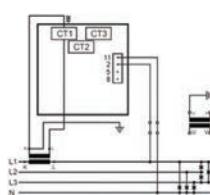

- Instruments operate on a fast sampling method of input quantities (current and voltage) of the connected phases
- Meters include "through hole" CT connection, voltage dividers, internal microprocessor and power supply unit
- Slot in screw fixing

LED synchroscope

360° LED SYNCHROSCOPE AND SYNCHRO CHECK RELAY

Where manual paralleling of two AC systems is desired, the frequency of both systems can be monitored by an LED synchroscope. The systems are synchronised when the green LED is lit in the 12 o'clock position. The instrument is rated for continuous operation and connection. For the semi-automatic paralleling of two AC systems, the voltage, phase displacement and the frequency of both systems can be monitored by this LED synchroscope and synchro check relay. Controls for voltage, phase angle, and time delay are provided. The systems are synchronised when the green triangular LEDs are lit together with the GEN/BUS green LEDs. A dead bus option is also available.

CALCULATION OF END SCALE VALUE

End scale value is calculated using the formula below, where correct voltage must be selected (either L-N or L-L), depending on the electrical system and the type of meter used. Scale factor, e.g. the relation between end scale value and nominal apparent power ($\cos\phi = 1$) must be between 0.6 to 1.2. It is recommended selecting the scale value from 1 - 1.2 - 1.25 - 1.5 - 2 - 2.5 - 3 - 4 - 5 - 6 - 7.5 - 8 (and their decades) closest to the calculated result.

| Electrical system | Formula | Example | End scale value to choose (considering 0.6 to 1.2 x S) |
|--|--|---|--|
| Single-phase, direct voltage connection | $P = U(L-N) \times I_p \times \cos$ | $P = 230 V \times 50 A \times 0.9 = 10350 W = 10.35 kW$ | 10 kW |
| 3-phase 4-wire, direct voltage connection (balanced or unbalanced) | $P = 3 \times U(L-N) \times I_p \times \cos$ | $P = 3 \times 230 V \times 400 A \times 0.95 = 262200 W = 262.2 kW$ | 250 kW |
| 3-phase 3-wire, direct voltage connection (balanced or unbalanced) | $P = 1.732 \times U(L-L) \times I_p \times \cos$ | $P = 1.732 \times 400 V \times 1000 A \times 0.9 = 623520 W = 623.52 kW$ | 600 kW |
| 3-phase 4-wire, voltage connection via VT (balanced or unbalanced) | $P = 3 \times U_p(L-N) \times I_p \times \cos$ | $P = 3 \times 5770 V \times 100 A \times 0.95 = 1644450 W = 1,64445 MW$ | 1.5 MW |
| 3-phase 3-wire, voltage connection via VT (balanced or unbalanced) | $P = 1.732 \times U_p(L-L) \times I_p \times \cos$ | $P = 1.732 \times 30000 V \times 50 A \times 0.9 = 2338200 W = 2,3382 MW$ | 2.5 MW |

CALCULATION OF END SCALE VALUE

End scale value is calculated using the formula below, where correct voltage must be selected (either L-N or L-L), depending on the electrical system and the type of meter used. Scale factor, e.g. the relation between end scale value and nominal apparent power ($\cos\phi = 1$) must be between 0.6 to 1.2. It is recommended selecting the scale value from 1 - 1.2 - 1.25 - 1.5 - 2 - 2.5 - 3 - 4 - 5 - 6 - 7.5 - 8 (and their decades) closest to the calculated result.

I_p = CT primary current, U_p = VT primary voltage, U = direct connected voltage, $\cos\phi$ = power factor.

| Electrical system | Formula | Example | End scale value to choose (considering 0.6 to 1.2 x S) |
|--|--|---|--|
| Single-phase, direct voltage connection | $P = U(L-N) \times I_p \times \cos\phi$ | $P = 230 V \times 50 A \times 0.9 = 10350 W = 10.35 kW$ | 10 kW |
| 3-phase 4-wire, direct voltage connection (balanced or unbalanced) | $P = 3 \times U(L-N) \times I_p \times \cos\phi$ | $P = 3 \times 230 V \times 400 A \times 0.95 = 262200 W = 262.2 kW$ | 250 kW |
| 3-phase 3-wire, direct voltage connection (balanced or unbalanced) | $P = 1.732 \times U(L-L) \times I_p \times \cos\phi$ | $P = 1.732 \times 400 V \times 1000 A \times 0.9 = 623520 W = 623.52 kW$ | 600 kW |
| 3-phase 4-wire, voltage connection via VT (balanced or unbalanced) | $P = 3 \times U_p(L-N) \times I_p \times \cos\phi$ | $P = 3 \times 5770 V \times 100 A \times 0.95 = 1644450 W = 1.64445 MW$ | 1.5 MW |
| 3-phase 3-wire, voltage connection via VT (balanced or unbalanced) | $P = 1.732 \times U_p(L-L) \times I_p \times \cos\phi$ | $P = 1.732 \times 30000 V \times 50 A \times 0.9 = 2338200 W = 2.3382 MW$ | 2.5 MW |

Reactive energy meter with power indicator

FEATURES

- Counts electrical reactive energy and indicates reactive power of electrical systems
- Several voltage ranges available
- Current connection via "through hole" CT on the instrument. No need to interrupt wiring from CT
- Pulsed output as standard

APPROVALS

- CE marked
- BV approved

BENEFITS

- High visibility
- Terminal cover included
- Low self consumption
- Separated power supply

GENERAL SPECIFICATION

| Maximum continuous overload | 2 x In, 1.2 x Un |
| Nominal frequency | 50/60 Hz |
| Voltage burden | <0.1 VA per phase |
| Current burden | <0.1VA per phase |
| Power supply | Various AC volts between 57.7 and 400 |
| Frequency | 40-65 Hz |
| Voltage burden | <3 VA |
| Pulsed output | 1 SO pulsed output with 1p/10 kWh, 1p/100 kWh, 1p/10 MWh, 1p/100 MWh. Maximum pulse rate may not exceed 33 pulses per second (1980 pulses per minute). If in doubt choose next higher value, e.g. 1p/100/ kWh instead of 1p/10 kWh |

Reactive energy meter with power indicator cont.

APPLICATIONS

- AC switchgears, panels and distribution boards
- Control boards
- Generator sets

CONSTRUCTION

- Instruments operate on a fast sampling method of input quantities (current and voltage) of the connected phases
- Meters include "through hole" CT connection, voltage dividers, internal microprocessor and power supply unit
- Slot in screw fixing

Long scale tap position indicators

FEATURES

- Monitoring of transformer tap position, hoist or valve position
- 3 wire system
- 21 position using 10Ω to 400Ω steps
- Moving coil indicator
- Stabilised power supply and transducer
- CE Approved

APPLICATIONS

- Monitor transformer tap position, hoist or valve position

BENEFITS

- Interchangeable dial
- Resistant to mechanical vibrations and shocks
 - Protective cover for terminal
 - Linear scale

Saxon series panel indicators

FEATURES

- Three compact case sizes
- Withstands high levels of shock, vibration, dirt and humidity
- Pivot and jewel mechanisms

APPROVALS

- UL approved file no. E203000
- CSA

BENEFITS

- Complies with ANSI C39.1 (IEC 51)
- IP54 (NEMA 3) protection
- Instruments comply with BS EN61010-1 and meet IEC414 (BS5458)
- Pass dielectric test (2600 V for 1min)

A range of 2¹/₂", 3¹/₂" and 4¹/₂" surface mount panel meters utilising pivot and jewel mechanisms and offering IP54 protection. The range includes iron vane and moving coil AC and DC ammeters and voltmeters and frequency meters designed to perform in demanding environments.

O16 series fiesta panel indicators

A robust range of short-scale 3½" surface mount panel meters offering IP55 protection and featuring a wide view contoured window. The Fiesta range includes iron vane and moving coil AC and DC ammeters and voltmeters, elapsed time and frequency meters and is ideally suited for demanding environments. Options include panel gasket.

Challenger analogue panel meters

FEATURES

- Measurement and indication of AC amps, volts, frequency and DC signals
- Surface or window mounting
- Rear zero adjuster on moving coil meters
- High torque pivot and jewel movement
- True RMS measurement meters
- AC and DC inputs
- Up to 40 A DC direct connected
- Up to 50 A AC direct connected

APPLICATIONS

- Marine panels
- Switchgear
- Distribution systems
- Control panels
- Embedded generation
- Energy management
- Building management
- Utility power monitoring
- Process control
- Motor monitoring

APPROVALS

- ANSI C39.1 1981
- IEC 51
- UL3111-1
- EMC
- LVD
- UL CSA

BENEFITS

- AC moving iron and moving coil mechanisms
- Reduced inventory
- 4 ANSI standard case sizes
- Detachable lower fascia plate
- Easy to modify for distributors
- Through holes for back of panel mounting

The Challenger range of analogue panel meters offers accurate measurement and indication of most electrical and electronic parameters in industry standard 1½", 2½", 3½" and 4½" case sizes. This innovative design features a detachable lower fascia plate, which allows the flexibility of either surface or window mounting. The fascia is simply unclipped to achieve the completely flush panel appearance of rear of panel window mounting.

AC moving coil rectified meters provide 1.5% accuracy of the full scale value and feature a rear zero adjuster screw for tamperproof installation. AC moving iron meters also provide 1.5% high accuracy and true RMS measurement.

OPERATION

The meters utilise a traditional pivot and jewel movement, incorporating specially hardened steel pivots and a spring loaded jewel. Ideally suited for all applications, including the most demanding conditions.

MOVING COIL METERS

These meters offer a centre cored, self-shielding moving coil movement using pivots, hairsprings and sprung jewels. Variations in movement are limited by design. All DC voltmeters are 1000 ohms per Volt, moving coil rectified products run at 900 ohms per Volt. Millivolt meters use a 5 milliamps/50 mV movement.

MOVING IRON METERS

This clapper type repulsion design utilises a pivot, hairspring and jewel movement. The bottom jewel is oil filled to provide damping while the top is sprung for resilience. All voltmeters are manufactured with internal voltage dropper resistors.

FREQUENCY METERS

Frequency meters utilise a 1mA/35 ohm DC moving coil movement driven by an EMC hard frequency conversion circuit.

DIALS, POINTERS AND SCALES

Dials are interchangeable between the Challenger meters for inputs within the published specifications of the meter. Options for non standard customised dials are available upon request.

CURRENT TRANSFORMERS AND SHUNTS

Our extensive range of current transformers provides accurate measurement of AC current and ratio matching to a consistent 5 or 1 amp secondary current, proportional to the primary current.

Our range of shunts ensures a DC millivolt signal exactly proportional to the system current for driving ammeters, providing accurate measurement of DC current up to 12000 A, with secondary inputs of, 50, 60, 75 or 100 mV DC to match the Challenger input.

007 switchboard meters

FEATURES

- Low profile
- Class 1 accuracy
- Optional panel gasket
- Reliability
- Long scale 240°

APPLICATIONS

- Switchgear
- Distribution systems
- Energy management
- Process control
- Building management

APPROVALS

- UL approved file no. E203000

BENEFITS

- Enhanced safety
- Reinforced insulation
- ANSI C39.1

The Crompton Instruments compact ANSI switchboard meter offers Class 1 accuracy metering performance packed in a low profile, depth saving case. The 007 switchboard meters are a direct drop-in replacement for our legacy switchboard products.

The compact case also offers a lightweight, heavy duty polycarbonate case which is electrically safe. The 4½ inch meter complies with ANSI-C39.1 specifications.

PRODUCT CODE AND ORDERING INFORMATION EXAMPLE

007-05GA-PZPZ-C7

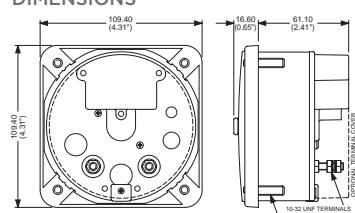

RMS compensated Switchboard meter.

HOW TO ORDER

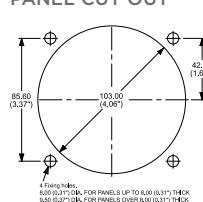

To order an equivalent for a 077, AB40 Or DB40 type meter, order exactly the same code, except replace 077 with 007.

E.g: 077-05FA-LSPK-C7 is 0-5A electrical scale, 0-100A dial AC ammeter, 50-60Hz. 007-05FA-LSPK-C7 provides identical specification in compact body style

APPROVALS

- c-UL UL listed
- E203000
- CE marked

BENEFITS

- Meets all the requirements of ANSI-C39.1 (1981)
- Parallax error-free platform dials
- Bump, shock and vibration proof
- Customised options and features

High quality range of switchboard instruments with Class 1 accuracy and which complies with American ANSI-C39.1 (1981) specifications. Available in 4 1/2" case size, the rugged design characteristics meet the needs of the most demanding environmental applications. This extensive range of analogue and digital/analogue meters utilises high shock and provides 1% accuracy for all RMS AC and DC ranges. The range offers various customised options and features.

DESCRIPTION

Our Switchboard Meter series offers two case types; models 007 and 078.

Model 078 is high shock hermetically sealed and all models have heavy gauge pressed steel cases. Mounting is by four integral studs. Model 078 has a die-cast bezel and a projecting moulded toughened glass window, which incorporates a gas tight zero adjuster.

Model 007 is a one piece flame retardant polycarbonate moulding with a black matte finished bezel area, and a specially contoured window to minimise reflection from adjacent light sources.

Scales are 240° moving iron and 250° moving coil with parallax error-free platform dials. Standard dials are white matte with black printed scales and bar knife-edge pointers.

APPLICATIONS

- Switchgear
- Distribution systems
- Generator sets
- Control panels
- Energy management
- Building management
- Utility power monitoring
- Process control
- Motor control

AC and DC ammeters, voltmeters and frequency meters

FEATURES

- 250° linear scale
- True RMS converting circuit
- RMS compensated rectifier
- Wide selection of AC and DC inputs

APPROVALS

- c-UL UL listed
- E203000

This range of self contained, pivot and jewel moving iron meters feature 250° linear scale. AC instruments are available with true RMS converting circuit or RMS compensated rectifier. While types of frequency meters can be damaged by transient supply voltage spike, Crompton Instruments 007-41 frequency meters can withstand, without damage, 10 successive transient spikes of 1250 volts. The range offers c-UL-us certification.

SPECIFICATIONS - GENERAL

Manufactured in accordance with American National Standards ANSI C39.1, (1981)

| | |
|---------------------------|--|
| Accuracy | ±1% full scale at 23°C (73°F) |
| Scales arc | 250° full scale deflection |
| Scale length | 007 and 078: 175.2 mm (6.9") |
| Scale plate | 2 piece, platform type |
| Response time | 007 and 078: Approximately 2.5 seconds to full scale |
| Operating temperature | 0 to 40°C (32 to 104°F) |
| Storage temperature | -10 to +50°C (14 to 122°F) |
| Extreme temperature range | -20° to +65°C (-4° to 149°F) |
| Terminals | Standard 10-32 UNF stud. M5 screw clamp is optional |
| Dielectric withstand | 2300 V AC for 1 minute between electrical circuit and case |
| Overshoot | 33% maximum |
| Enclosure code | 007: IP54, optional IP55 and 078: IP67A |
| Certification | c-UL-us |

For alternative voltage rating 200-250V, use code RN instead of PN.

For alternative voltage rating 380-480V, case types 007/078 use code SE instead of PN.

AC wattmeters and VArmeters

The Crompton Instruments Switchboard series of AC Wattmeters and VArmeters incorporate a DC moving coil, pivot and jewel indicator with a micro-circuit watt transducer PCB to read power on single or three phase systems with optional transformer isolation. The most frequently selected wattmeter scale marking for common current and voltage transformers are listed on the following pages. In addition, these instruments may be supplied with zero-left or centre-zero scale.

SCALING

Wattmeter and VArmeter current circuits should have equal carrying capacity because they are frequently connected in series. This means that the sum of the left and right end-scale values of the VArmeters should be equal to or greater than the full scale value of the Wattmeter (or have higher end-scale values if the instruments are centre or offset-zero). Instruments measuring 10,000 kilowatts and over are marked in megawatts. Centre-zero or offset-zero Watt and VArmeters are marked "IN" for left deflection and "OUT" for right deflection. On ordering, Wattmeter and VArmeters scales will be calculated, the nearest preferred scale will be offered from the charts on the following pages. Custom scales are available but at an extra cost.

CALIBRATION

For full load value of Watts or VAr, assuming unity power factor:

1-phase 2-wire Watts = amps x volts

3-phase 3-wire Watts = amps x line-to-line volts $\times \sqrt{3}$

3-phase 4-wire Watts = amps x line-to-neutral volts $\times 3$

Minimum scale values are obtained by multiplying resultant Watts, using the above formula $\times 0.7$ and selecting next higher standard scale.

For maximum scale value, multiply $\times 1.3$ and select the next lowest standard.

If scale calculates to an exact listed value, use this value rather than the next higher or lower value.

Note: When ordering Wattmeters and VArmeters, please specify CT ratio, VT ratio and required scale.

007 synchroscope

FEATURES

- 2.5 degrees accuracy
- Enhanced safety
- ANSI C39.1
- Reliable

APPROVALS

- c-UL UL listed
File number E354483

BENEFITS

- Enhanced safety

The Crompton Instruments AC synchroscope measures and displays the frequency difference of two power sources. Monitoring the display allows the user to connect two synchronised AC power systems together. This can help prevent the potential damage caused by connecting two unsynchronised power sources.

The 4.50" meter complies with ANSI C39.1 specifications.

ACCESSORIES

The ANSI Switchboard AC Synchroscope also comes with a range of accessories to complement the product.

- Neoprene panel gasket
- Terminal cover

LED digital | analogue combination

FEATURES

- Rugged shock and vibration resistant pivot and jewel design
- High accuracy LED display
- Wide selection of AC and DC inputs
- Maximum trend indication visibility
- Input isolation
- External decimal point selection option
- Interchangeable with 4 1/2" switchboard meters

APPLICATIONS

- Switchgear
- Distribution systems
- Generator sets
- Control panels
- Energy management
- Building management
- Utility power monitoring
- Process control
- Motor control

APPROVALS

- c-UL UL listed
- E203000
- CE marked

BENEFITS

- Cost effective
- Meets all the requirement of ANSI-C39.1 (1981)
- IP54 (NEMA 3) protection
- Optional IP55 (NEMA 4) gasket
- Bump, shock and vibration proof
- Customised option and features

Crompton Instruments model 007-DI features a combination of the traditional 250° 4 1/2" switchboard indicator with the trend indication plus the benefits of wide angle LED visibility. This rugged shock and vibration resistant design provides precision accuracy and instantaneous reading via the bright in-dial mounted 3 1/2" digit LED display.

DESCRIPTION

Model 007-DI digital analogue indicators are ideal for all applications where moving pointer instruments are preferable to indicate trend with the simultaneous display of a high visibility precision LED readout for increased user interface.

The 007-DI is interchangeable with other analogue and digital instruments designed to directly mount in to a standard ANSI-C39, 4 1/2" switchboard cut-out. Available in side, centre, or off-set zero versions, the 007-DI can accept AC and DC current and voltage inputs as well as a wide range of transducer outputs, making it suitable for a variety of other applications including low-load current, temperature, speed, Watt/VAr, percent and level.

239 Meter relay panel meters

FEATURES

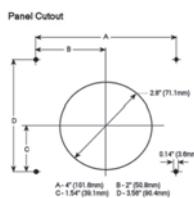

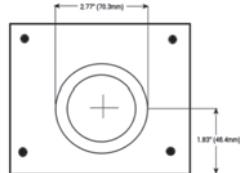

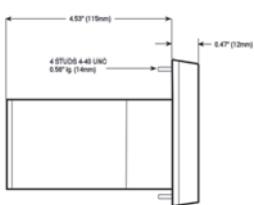

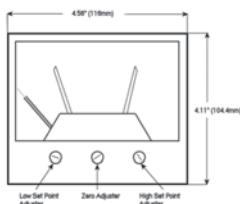

- Class 1.5 Accuracy
- Stable electronic switching circuit does not use lamps, photocells, inductors or capacitors
- Isolated input signal
- Control function continues if the indicator becomes damaged
- Rugged, shock and vibration resistant design
- LED relay status indicators

APPLICATIONS

- Liquid level control
- Load shedding
- Power factor correction
- High & Low alarms
- Shutdown
- Frequency monitoring
- Temperature indication and control

DIMENSIONS

Series 239 meter relays combine a highly accurate indicator with High and Low set point relays. The relays can operate alarm and control devices when the monitored signal value moves outside the chosen set point limits shown by adjustable red index pointers. A single compact case houses the unit which requires only the input signal and power supply thus saving space and installation time.

Sealed and ruggedised panel indicators

FEATURES

- Designed specifically for stringent industrial, marine and military specifications
- An extensive range of high accuracy measuring instruments in 3 case sizes
- Rugged Hi-Q taut-band suspension
- Bump, shock and vibration proof

APPROVALS

- DEF STAN 66.7

BENEFITS

- Complies with BS EN60051 (IEC51)
- IP67 (NEMA 6 and 6P) protection
- Dial illumination option
- Parallax error-free platform dials for 078/087. Optional for 083/084

078/080/087 SERIES 240° SCALE

The Crompton Instruments 078/080/087 series of heavy duty sealed instruments are designed to comply with the most stringent industrial, marine and military specifications.

This metal cased range offers bezel sizes of 57 mm, 83 mm and 110 mm all fitted with toughened glass. Indicators comply with Ministry of Defence specification DEF STAN 66.7. and operate efficiently in the most adverse environments where extreme conditions of shock, vibration, dirt, humidity and temperature variation are present.

DESCRIPTION

Indicators have metal cases with bezel sizes of 50 x 57 mm (083), 83 mm Ø (084) and 110 mm x 100 mm (078/087). All indicators are fitted with toughened glass windows. The standard black matt finish can be replaced with options ranging from light admiralty grey to BS3181C No:697. To prevent fogging, all indicators have been dried, evacuated and filled with dry nitrogen during manufacturing. The case interior retains a constant pressure of at least 94kPa above the exterior with leakage not above the equivalent of 1.33 Pa ml/s of air. Except on model 083, panel sealing gaskets are standard equipment.

Standard instrument dials are finished in acrylic white matt with black printing and a parallel pointer. Scales form a true arc with zero on the left hand-side. Options include dial illumination, a centre, off-set or suppressed zero, colour index lines, bands, zones or segments, a black dial with white printing, and customer logo.

Sealed and ruggedised panel indicators

080 SERIES 90° SCALE

A range of metal case, sealed instruments for industrial and military applications involving extreme shock, vibration, temperature, dirt and humidity. Bezel sizes 57 mm, 83 mm comply with Ministry of Defence specification DEF STAN 66-7 or DEF STAN 66-9 for all standard ratings.

DESCRIPTION

Two bezel sizes of 57 x 57 mm (083) and 83 mm Ø (084), with barrel diameters of 53 mm (083) and 67 mm (084) and toughened glass windows are used throughout the series. To avoid fogging they are dried, evacuated and filled with dry nitrogen. Panel sealing gaskets are provided as standard with the exception of Model 083. Models 083 and 084 have steel cases with fixing holes in the flange. Sealed zero adjusters are provided. Standard instrument dials are finished in a white matt with black printing and parallel pointer. The scales form a true arc with zero on the left.

OPTIONS

Available options include dial illumination, a centre, off-set or suppressed zero, colour index lines, bands, zones or segments, a black dial with white printing and customer logo. Instruments operated by separate transducers indicate watts, VA, frequency, phase angle, current, voltage and other physical/mechanical parameters are also available. Illumination options as follows:
Models 083/084: Edge, white or red bulb, 12 or 24 V, illumination.

Instrument selector switches

FEATURES

- Compact size
- Reliable design
- Multi pole

APPROVALS

- IEC EN 60947-3
- VDE 0660 part 107

BENEFITS

- Cost effective
- Easy to install
- High protection class

Panel mounted selector switches offer a 7-position voltmeter switch and a 4-position ammeter switch for reading line-to-line or line-to-neutral voltage and phase current.

Each switch is supplied with both numbered and coloured annotation.

APPLICATIONS

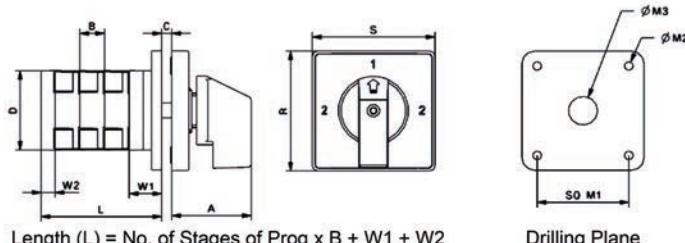

- ON-OFF Switches
- Change over Switches
- Multi-step Switches
- Volt-Ammeter Switches
- Selector Switches
- Mains Switching
- Coolant Pumps
