Every designer that works with electronic components knows well integration system, reliability and custom products problems.

ATE Electronics solves these problems since 1970 producing power resistors with high quality and technology.

We pay attention to all Customers enquiries giving our best solution and warranty at low cost and fast delivery.

Sandro Felisio CEO

puoluelle

ATE

ATE Electronics products set:

- CS axial wirewound resistors (2W to 15W), thanks to row materials of very high quality and reliability, can replace with better permormances resistors in ceramic glaze.

- Aluminium housed RB series (10W to 250W) can supply in small dimensions high power with low operating temperature.

- CS and RB series can be supplied on request in special versions (fuse resistors, high pulse overload, non inductive...) and with custom leads (high insulation voltage terminals, faston, screw....)

- **3SM** (3W) for surface mount applications wich allow the replacament of traditional axial resistors with the same electrical characteristics of 3CS type

- Anti moisture devices DAT (100W & 150W)

- Symmetry resistors SR (10W & 13W) for voltage divider and discharge of electrolitical capacitors.

- Fuse resistors RF (2W to 15W)

Looking for best quality, our intent is always obtain the Customer's satisfaction with excellent products and services.

For this ATE Electronics since 1994 was one of the first Italian Companies to be certified with quality system compliant to UNI EN ISO standards.

In feb 11th 2010 we obtained the update to UNI EN ISO9001:2008, certificate nr. 9170.ATEE

All our products are made in Italy and compliant with RoHS, MIL & CECC.

Our staff on all our products is able to satisfy all Your enquiries

MADE IN ITALY

QUALITY

EXACT E ORDERS

EN 2010

6

For non inductive types You have to add the letter "N" after resistor type. Ex.: CSN - RBN

To order CS resistors taped on reel add the suffix "/ 73" after the resistor type. Ex.: 5CS/73 1K0 J Quantity for reel: 1500x2CS, 1000x3CS, 5CS and 6CS

Tolerances:

K H 3%

10%

5%

Fixed power wirewound resistors aluminium housed 10 W to 250 W

FIXED POWER WIREWOUND **RESISTORS ALUMINIUM HOUSED**

TEATURES

Extruded aluminium housing provides superior heat conduction. Housing deep finned for maximum heat dissipation at natural or forced air convection.

Gold anodized finish for maximum resistance to environmental conditions. Special thermosetting compound with high thermal conductivity. Winding designed to give maximum core coverage and uniformity for even heat dissipation.

Core centerless ground for maximum winding uniformity. Marking at top surface for easy identification after mounting. Complete welded construction terminal to terminal.

These resistors meet or exceed the requirements of MIL-PRF-18546 G specifications. **CE ELECTRICAL SPECIFICATIONS**

- Ohmic values

Specifications Serie E24. For out of range or not standard ohmic values, consult ATE Technical Dept. Tolerance

Standard 5%. Available on request up to 1%. - Temperature coefficient

±30 ppm R > 20 Ohm

±50 ppm 1 Ohm < R < 20 Ohm ±100 ppm 0.1 Ohm < R < 1 Ohm

- Dielectric strength

1500 Vac for RB10

2500 Vac for RB25 and RB50 3500 Vac for RB75, RB101 and RB150 4500 Vac for RB100 and RB250

- Insulation resistance 10000 MOhm minimum

1000 MOhm after moisture test

- Overload

5s at 5 times rated power

- Non inductive Models of equivalent physical and electrical specifications are also available with non inductive Ayrton-Perry winding

CE MECHANICAL SPECIFICATIONS

- Terminal strength

10 lb. pull test; 3 Nm x RB100 and 4 Nm x RB250 max torque - Solderability

Satisfactory when tested in accordance with method 208 of MIL-STD-202. The use of high temperature solder is recommended when resistors work near the maximum specified ratings

CE MATERIALS

- Core
- Ceramic steatite or alumina centerless ground
- Resistive Element
- Copper-nickel alloy or nickel-chrome alloy with specific temperature coefficient - End caps
- Stainless steel
- Encapsulant High temperature thermosetting compound
- Housing

Aluminium with hard anodic finish

- Standard terminals

Copperweld RB10 to RB150

Stainless steel for RB100 and RB250

DERATING

ATE RB resistors have and operative temperature range from -55°C to +250°C Derating is required for reduced chassis area and for high ambient temperature
